DURO-LAK INC FIRE RETARDANT MAT FINISH SYSTEM ZMP7774 & ZMP3003

Our new Fire Retardant Polyester Wood coating was designed by our Research & Development team, to meet the highest requirements , for private aircraft interior wood veneer.

The advantages of ZMP7774 & ZMP3003 are...

- Fire retardant as per FAR 25-853 (a) system
- High flexibility
- Extremely clear and transparent
- Available in different gloss
- Complete system application in 5 days
- At 30 mils dry film, of the ZMP7773 & ZMP3003 passed 20 cycles , no cracking at – 43°F to 130°F
- U.V. Block, as per ASTM D4329, the panels were exposed during 200 hours under UVA-340 lamps, resulting in no yellowing, no loss of gloss and no change in the colour of the wood.
- High reflectivity
